About Me

As a Front End Development student at Medieinstitutet, I am driven by a long-standing interest in the field of IT. I possess a natural inclination for challenging myself, and I thrive in dynamic and fast-paced environments. I am an avid learner of emerging technologies, and consistently demonstrate an eagerness to explore new tools and techniques. As for my hobbies, I enjoy spending my free time engaging in activities that keep me active and social. I love gaming, playing padel, and connecting with my colleagues for after-work gatherings.

Experience

Stora Enso 2015 - 2023

During my tenure at Stora Enso, I was responsible for a variety of tasks. Primarily, I monitored the production process of our board product from the pulp stage to the finished board stage. Through this experience, I gained valuable insights into the importance of adaptability and continuous learning. Additionally, I gained a deep appreciation for the value of teamwork and collaboration, as well as the significance of setting clear objectives in order to maintain progress.

Education

2022-ongoing
Medieinstitutet

Throughout my tenure at Medieinstitutet, I have acquired a solid foundation of skills that I'm eager to expand upon. In addition to programming, my studies have encompassed agile project management, version control, and user experience design, among others.

2011-2014
Karlfeldtgymnasiet

I pursued a computer science education with a focus on programming, taking courses such as Web Development 1 and Programming 1 (C++), which provided me with a foundation in technology and IT.
